

HAND GLUER

Self-Operated Cold Gluing System

Valco Melton's hand operated adhesive application systems are adaptable from low volume case sealing and carton closing to woodworking and other custom product assembly requirements. These applications systems ensure longer adhesive life, achieving maximum efficiency, and improved versatility.

- Enclosed systems prevent adhesive contamination and premature drying for longer adhesive life
- Save adhesive waste with a consistent volume of adhesive each time your hand gun is activated
- Operate seamlessly with a variety of adhesives, including high-performance formulas that are not easily applied using other methods

Extrusion

Applicator heads available for various adhesive pattern widths. Standard sizes range from single stripe to 6 inches wide. Custom applicator heads can also be supplied.

Spray Valves

There are several different spray valves to choose from for high volume or low volume requirements. Models 465 and 472 are self-cleaning and feature adjustable outputs.
